

BARNETT EXTRA-PLATE CLUTCH KITS

INSTALLATION INSTRUCTIONS

1. All kits install the same as stock components, except that one or two extra friction and metal plates are used.
2. Will not work with "EZ Pull"/"Easy Clutch" device that reduces Pressure Plate release/movement.
3. When installing new plates, be sure that all components fit in the clutch basket smoothly and with no binding. Check Basket, Hub and Pressure Plate for wear/grooving. Replace as required.
4. Some kits are supplied with heavy-duty springs. On these; the stock springs may be used if the lever pressure is too severe.
5. Follow factory manuals when adjusting cable freeplay, pressure and throw-out mechanism clearance.
